

Biomedical ontologies, where is the use / user?

Panel

Tuesday July 24th

Why this panel?

- Alan Rector: Ontology/Ontologists too often face in, we should face outwards
- James Malone: Ontology developers need users more than users need ontology developers

Questions

- Is there any need if ontologists are the only ones (re)using ontologies?
- Who / where are the users?
 - In biology?
 - In medicine?

Panelists

- Jeff Wilcke, VirginiaTech
- Larry Hunter, University of Colorado
- Mark Musen, Stanford University
- Rachel Richesson, Duke University
